DraftStoppa

The DraftStoppa®

- **Prevents** hot or cold air entering the home via the exhaust fan.
- **Prevents** polluted air or cooking smells from entering into other parts of the home or workplace.
- **Exceeds** the Sustainable Energy Authority Victoria 'First Rate' energy rating performance level requirements for a totally self sealing exhaust fan.
- Is economically priced and adapts to most major ceiling exhaust fans.
- Fits most standard and 3 in 1 type ceiling exhaust fans.
- Is simple to install and opens and closes effortlessly without loading-up your ceiling exhaust fan motor.
- Is fully recyclable.

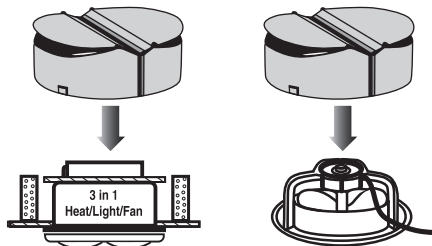

The 'DraftStoppa' comes ready to assemble and can be installed by anyone in a matter of minutes!

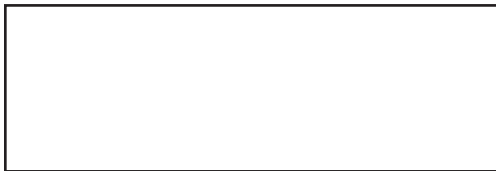

'Product of the Year' 
HIA GreenSmart®
AWARDS 2003

Testing by Complex Air Conditioning Pty. Ltd. and reviewed by the Victorian Sustainable Energy Authority indicates that in areas where ceiling exhaust fans are in use this can give an energy saving of up to 30%.

The 'DraftStoppa' fits most standard and 3/1 type ceiling exhaust fans.

DraftStoppa®

Mounting Plate

For use with DraftStoppas® when used with Heat/Light/Fan Combination Units

WARNING: When installing a DraftStoppa® over Heat/Light/Fan combination units, the switch must be rewired by a qualified electrician in accordance with the AS/NZS 3000:2007 wiring instructions to ensure the fan always operates when the heat lamps are in use. Detailed information included with DraftStoppa® instructions.
